Renault Pro+ is broadening its range of electric LCVs with the introduction of the Master Z.E. large electric van – the ideal workhorse for emissions-free access to city centers. Master Z.E. is ideally suited to last-mile deliveries. It is designed for everyone who believes environmental issues are fundamental.

Renault Pro+ is also introducing **Renault EASY CONNECT for Fleet**, an ecosystem of connected services for business users that simplifies managing vehicle fleets and reduces running costs.

“

With Master Z.E., Renault Pro + is enlarging its e-LCV line-up consistent with the “**Drive the Future**” strategic plan, in which 100% of vans will be electrified. The current line-up, ranging from quadricycles to heavy vans, covers the main needs of business customers in terms of cargo volume and payload, enabling them to make emissions-free last-mile deliveries in city centers. In addition, a new ecosystem of connected services has been rolled out to improve fleet management and help customers to grow their businesses.”

ASHWANI GUPTA

SVP, LCV Business Unit, Renault-Nissan

“

Groupe Renault continues to implement its electric-vehicle growth strategy by strengthening its coverage of key market segments. The launch of Master Z.E. meets the needs of professionals to adapt to urban environmental issues. Master Z.E. is a further proof of the expertise of Renault, the European leader in electric vehicles.”

GILLES NORMAND

SVP, Head of the Electric Vehicles Business Unit

#MasterZE

A LARGE ELECTRIC VAN FOR CITY CENTERS

Master Z.E. is ideally suited to city-center last-mile deliveries. It is designed for everyone who believes environmental issues are fundamental.

“

Master Z.E. is a response to social responsibility issues that are of great importance for our company. Also, we aim to be forerunners in our sector of activity by including electric vehicles in our fleet. We are doing this to: address today's environmental issues, anticipate the greening of freight transport in the urban environment, deliver an offering that sets us apart in calls for tender, an aspect of growing interest for our customers, and, last, to provide our employees with a clean, silent, economical vehicle, tailored to the constraints of urban distribution.”

FRANCK ROGNON

National Logistics Director, Rentokil Initial

Rentokil Initial is a worldwide leader in the sector of rodent control, insect control and disinfection, as well as in the rental-maintenance of textile and washroom equipment.

ELECTRIC

Master Z.E. incorporates all the know-how of Renault, Europe's leader in electric vehicles. Master Z.E.'s 120 km real-world driving range and charging time (full charge takes just six hours) makes it highly-suitable for day-to-day last-mile deliveries.

TAILOR-MADE

Master Z.E. features all the tailor-made solutions from Renault Pro+, a brand that is fully dedicated to professionals and the European leader in vans.

#MasterZE

ELECTRIC

Master Z.E. incorporates all the know-how of Renault:

A new-generation battery, a high energy efficiency engine, connected services.

ENGINE

Master Z.E. is fitted with the 57kW/76hp R75 high energy efficiency electric engine. This engine, tried and tested on ZOE and Kangoo Z.E., makes Master Z.E. ideal for use in and around the city. Master Z.E.'s maximum speed is 100 km/h (72 mph). Activating Eco Mode extends the range by limiting engine performance – slower acceleration, maximum speed limited to 80 km/h (50 mph).

BATTERY

Master Z.E. is fitted with the new-generation 33kWh "Z.E. 33" battery with optimized electronic management. This battery combines the expert know-how of Renault and LG Chem to optimize energy density. No trade-offs in reliability, safety in use or load space were required for this upgrade.

CONNECTIVITY

Access to a wide scope of connected services: My Z.E. Connect to view the vehicle's range, Z.E. Trip to locate all the charge points, Z.E. Pass to pay your recharging.

#EASYCONNECT for Fleet

TAILOR-MADE

Master Z.E. offers all the tailor-made features from Renault Pro+ for professionals: it is a genuine workhorse for in-town deliveries, a large number of versions, access to a specialist network for professionals and tailor-made conversions.

A GENUINE WORKHORSE FOR IN-TOWN DELIVERIES

Master Z.E. is a great partner for business users working in urban areas, thanks in particular to the optional Wide View mirror, the reversing camera (with a screen built into the inside rear-view mirror) or the reversing radar. Master Z.E.'s cab features a genuine mobile office space with a dashboard swivel table and document holder, as well as a large number of ergonomic storage compartments.

A WIDE RANGE OF VERSIONS

The Master Z.E. range includes 6 versions to meet the specific needs of business users (3 lengths, 2 heights). The four van versions feature an 8–13m³ load space and a payload of 975 kg to 1,128 kg. The two platform cab versions have a transport capacity of up to 22m³ and feature payloads of 1,377 kg (L2H1) and 1,355 kg (L3H1).

A SPECIALIST NETWORK

The Renault Pro+ specialist network has 650 businesses across 40 countries with 400 approved converters in 29 countries. The teams are fully-trained and equipped to care for electric LCVs, while taking its customers' business imperatives into consideration.

TAILOR-MADE CONVERSIONS

A network of 400 approved converters in 29 countries, able to convert LCVs to meet the specific needs of each business customer.

#EASYCONNECT for Fleet

AN ECOSYSTEM OF CONNECTED BUSINESS FLEET MANAGEMENT SERVICES

Renault EASY CONNECT for Fleet is an ecosystem of connected services introduced by Renault Pro+ for business users. It simplifies fleet management and reduces costs through secure and affordable connectivity as well as partnerships with the best known telematics service providers to meet each company's requirements.

Renault EASY CONNECT for Fleet will be available on the entire range of new Renault vehicles in Europe by mid-2018.

#EASYCONNECT for Fleet

CONNECTIVITY

Renault EASY CONNECT for Fleet can automatically and securely provide the data from the fleet of Renault vehicles by means of the Renault Communication Adapter unit, which connects to the vehicle's electronics. Renault guarantees this system's security in respect of vehicle data.

RENAULT COMMUNICATION ADAPTER

This telematics unit remotely sends relevant information in real time: mileage, range, geographic location, fuel consumption, technical alarms, and even how many miles to the next service.

ECONOMICAL AND ECO-RESPONSIBLE

The monitoring of reliable, precise and diversified data helps to cut fleet running costs: lower consumption, manage and plan servicing. It also contributes to an eco-responsible driving that enables costs and CO₂ emissions reduction.

#EASYCONNECT for Fleet

PARTNERSHIPS

Because business users' requirements differ widely **depending on their trade**, because there are so many different trades and country-specific needs, Renault partners with Telematics Service Providers (TSPs*) to develop tools that are relevant to each business activity.

COLLABORATION

Renault is partner with many TSPs: Fleetmatics, Kuantic, Masternaut, Optimum Automotive Group / Mapping Control, Telogis and TomTom Telematics. Other partnerships are currently under discussion with a view to expanding the offering still further. Renault sends the vehicle data to these TSPs via secure servers. The TSPs can then process this data and use it to provide relevant services to the customers.

Through its branch RCI Bank and Services, Renault will provide a "Fleet Asset and Tracking Management" service. This tool combines detailed financial services, real time date on vehicles, geolocalisation and eco-driving.

FLEXIBILITY AND COMPATIBILITY

Business users **who don't yet have a telematics service** can find the best solution for their trade among the partnering TSPs' ranges and manage their fleet of Renault vehicles.

Business users who **have already implemented a partnering TSP's telematics service** can add Renault Easy Fleet Connect to send the data from their Renault vehicles.
